Curiers to Meet

The annual meeting of the
Oyen curling club will be held
in the Masonic Hall, Oyen, on
Wednesday evening, November
14, at 8 o'clock p.m. Everyone
interested in the "roarin' game"
is cordially invited to be pre-
sent.

Eric Sharp of Scotland, Alta.,
was an Oyen visitor last Sun-
day.

IN LIGHTER VEIN

"Her niece is rather good
looking, eh?"
"Don't say 'knees in,' say
'knees are.'"

A motorist was recently fined
for running over a pig. This
should serve as a warning to
car-owners not to treat pigs
like ordinary pedestrians.

"The ancient Greeks were
short skirts," says an archaeol-
ogist. An ungallant critic re-
marks that there are ancient
Britons who do the same—
London Opinion.

To-night's Bedtime Story

Once upon a time there was
an old-time fiddler who had
his leg taken off at the knee.
After that he could not tap his
foot, so he gave up fiddling.

Alberta Pacific Elevator at Cereal, Demolished by Fire

The Alberta Pacific elevator at
Cereal, was destroyed by fire
yesterday afternoon. Fortu-
nately the slight wind blowing
at the time was in a favorable
direction, and the large band of
volunteer fire-fighters were able
to stop the fire spreading to ad-
jacent buildings.

The superintendent of the
company, together with the
local buyer, had been fire-guard-
ing the building and, appar-
ently had everything out, when a
tremendous blaze broke out
under the runway, and all
efforts to subdue the blaze fail-
ed, with the result that the
building was totally destroyed.
About 25,000 bushels of wheat
were in the elevator at the time
and it is difficult to estimate
what amount of this can be
salvaged.

Good work was done by vol-
unteer fire-fighters with buck-
ets of water to save the ad-
jacent buildings.

Halloween Masquerade

The halloween masquerade
held Wednesday in Oyen
Theatre proved a very popular
event and was well patronized.
The interior of the theatre was
artistically decorated for the
occasion, and when the dancers
were on the floor, presented a
gala appearance.

Mr. and Mrs. Stahl of Excel
won the prizes for the best
dressed gentlemen and lady, re-
spectively, and the prizes for
the best comic costumes were
won by Miss Katie Ruffa and
Miss Josephine Oszust.

The Family Herald and
Weekly Star of Montreal with
its wonderful improvements is
recognized as the greatest mon-
ey maker for farmers in Can-
ada, while its magazine section
is a gem unrivalled.

The Menace of Communism

The Sixth International Communist Congress held in Moscow this year declared its avowed policy "to concentrate Communist propaganda on the young people of the world, not on the young people of Russia, or even of Europe, but of the world."

Has that declaration any meaning for Canada? Is it one that the people of Canada need pay any attention to, or in regard to which they should take action?

Communism thrives where there is oppression, injustice, extreme poverty, lack of employment resulting in enforced idleness, and, inevitably arising from these conditions, general discontent. Satan still finds mischief for idle hands to do, and there is nothing quite so mischievous in the world today as Communism and its many pernicious doctrines.

Communism, therefore, found fertile ground in Russia owing to the centuries old oppressions and injustices of the old Tsarist regime, during which the most abject poverty and ignorance continued among the masses of the people alongside an aristocracy rolling in wealth and indulging in all forms of extravagance and luxury. The added sufferings, sacrifices and horrors of the Great War were all that was necessary to set the country aflame and provide the Communists with the opportunity they had long been awaiting.

In Canada, unlike Russia, there is no oppression of the people; injustice is not tolerated, and it is expected to be remedied; cases of extreme poverty are rare indeed, and, when found, sympathetic governments, organizations and people respond to the call of need; work, as a rule, is available to all who are willing to work, and seasons of unemployment are but temporary and not a general thing; the overwhelming mass of the people are happy and contented. The soil of Canada is, therefore, not fertile ground for cultivation by the Communist agitator.

Nevertheless, the Communist movement in the Communists of Russia in their visionary attempt to grasp world power through the overthrow of all institutions of law and order, all religions, the destruction of all present forms of government, and the confiscation of all property and other rights of individuals. The Communist will never be satisfied until he brings about a reign of terror and a condition of chaos in all countries similar to that created by him in Russia and in certain portions of China. Wherever there is trouble, war, political, social or economic, the Communist is sure to find his opportunity, and in the past Canada has not been free from manifestations of Communist intrigue and activity. And the Moscow authorities still ready to finance and otherwise support all such efforts.

The Communist leaders, however, that they cannot make much headway with the adult populations of Canada, the United States, and the self-governing Dominions of the British Commonwealth. Hence their openly avowed intention to concentrate their propagandist activities on "the young people of the world."

And therein lies the danger to Canada. If in their youth while their minds are plastic and open to receive impressions, and before their characters are formed, the boys and girls of Canada, or of any country, can be inculcated with the virus of Communist disbelief in God and religion, Communist repudiation of all accepted ideas of morality as merely man-made restrictions on individual liberty, Communist rebellion against all constitutional systems of government and courts of law and justice, and Communist doctrine that there is nothing good but everything that is bad in all countries except Russia where, for the time being, Communism holds the whip hand and wields a lash over everybody who dares to voice even the mildest criticism of its methods.—If we say, the youth of Canada can be infected with such ideas, then the very foundations of all that we revere and hold dear in Canada today are being very seriously undermined.

Communism is conducting such a campaign in Canada at the present time. The orders of the International Congress, at Moscow, are being carried out to the letter. Communist day schools and Soviet Sunday schools are being conducted, the most excellent literature for children is being circulated, and every conceivable plan to attract the interest of the children is adopted and followed. In an age when there is a youthful tendency to scoff at religion as old-fashioned, God, the church, and all religion is openly as well as covertly repudiated, young men are encouraged to "go the limit" in throwing off the conventions and restraints of the past, and are ridiculed if they hesitate to do so. The sanctity of the home is laughed at, and parental, as well as all other forms of authority regarded as forms of slavery and a denial of the rights of youth.

The campaign is highly dangerous. It is an insidious campaign, and therein lies its greatest danger because it is so frequently difficult to locate and combat it. In so far as it must be fought and dragged into the open for fighting it is, otherwise grief and sorrow is being prepared for parents and children alike, for the home, the church, and the state.

In setting their faces sternly against this disruptive thing, let the Canadian people see to it that no oppression, no injustice, no suffering through poverty or because of lack of work, is allowed anywhere in the Dominion. Let the churches forget their minor differences in doctrine or in forms of worship, and, instead of fighting each, unite their forces in order that effective warfare may be waged on a system which, if it is not destroyed, will ultimately destroy all churches and all religion, and, in destroying these great bulwarks, destroy also the home and the state, and lead to the domination of the individual.

Big Demand For Sheep

British Columbia Owners Shipping Thousands To Market

Along with the vastly improved position and prospects of grain farmers, beef cattle men in British Columbia, who held on during lean years, are reaping their reward. Sheep farmers as usual are on velvet—sheep have been a consistently good bet in British Columbia for years, and appear likely to remain so. Heron Bros., with 135 per cent. increase from the lamb crop are shipping between three and four thousand head

to market and retaining around one thousand ewe lambs for breeding stock. The demand for sheep is strong and, with more and more farmers getting into the game on a big scale and farmers generally increasing their attention to sheep in smaller numbers, the temptation to sell is almost irresistible.

An Oil That Is Famous.—Though Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of that famous compound. From here and from the United States, Canada and South America, the West Indies, Australia and New Zealand. That is far ahead enough to attract its attention, for in all these countries it is on sale and in demand.

Pennies to the number of 800,000,000 are collected every year in the slot gas-meters of consumers served by the Gas Light and Coke Company, London.

A Scotchman recently used a baseball company because he was hurt while watching a ball game. He felt out of a tree.

Oil Shale and Tar Sands

And in Alberta

Canada has vast resources of oil shale and bituminous sands, the former occurring in Maritime Provinces, and the latter in Alberta. These deposits have long been considered as potential sources of products generally obtained from crude petroleum. As a result of recent innovations in refining methods these raw materials may now be seriously considered as sources, to be drawn upon when needed, to help in supplying the rapidly increasing demand for motor fuel.

WOMEN OF MIDDLE AGE

Need Rich, Red Blood To Maintain Good Health

After passing the age of forty every woman has reason to grow anxious about her health. This time of trial, with its attacks of fainting, its fits of depression, its often violent headaches and back pains is rightly dreaded by women; but if these distressing symptoms are taken as a warning of the health, no serious illness will arise. At this turning point in life Dr. Williams' Pink Pills have given a helping hand to thousands of suffering women who were fighting a hopeless battle against weakness and wasting diseases.

The very best help for any woman of middle age is the health help given by Dr. Williams' Pink Pills. These pills reinforce the blood supply, enrich the purveyor of life, and give the system the strength and vitality to overcome all ailments. By this natural process Dr. Williams' Pink Pills completely drive out all pains and weakness, and a better, happier condition of health and spirits arises.

Every woman of middle age should take advantage now of the wonderful health-help of Dr. Williams' Pink Pills. They are now by all medical dealers or will be sent by mail at 50 cents a box, by The Williams' Medicine Co., Brockville, Ont.

Help For Mental Cases

Administration Of Gaseous Mixture Has Strange Results

A miraculous demonstration of awakening persons mentally dead was made by University of Wisconsin scientists before the seventh annual convention of the Central North American Psychiatric Association, at Madison, Wis.

Two patients from the state insane asylum were aroused from mental and physical stupors lasting over many months by administration of a gaseous mixture. One was "set up," moved naturally and talked lucidly.

Going Upstairs Had to Sit Down Breath So Short

Mrs. M. Brouseau, Magog, Que., writes: "For many years I suffered with shortness of breath. Then, four years ago I had palpitation of the heart, and was so bad I had to sit down two or three times when going upstairs. I read about

MILBURN'S HEART AND NERVE PILLS
so I got a box, and in no time I felt better, so I took three boxes more and I have never had shortness of breath since."

Price 50c. a box at all druggists and dealers, or mailed direct, receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

A man is as old as he feels; a woman as old as she feels inclined to tell you.

Canadian Arctic Expedition

Well On The Way To Frozen North, Equipped With Radio

An example of the use of Canadian products by the Canadian Government in important scientific and exploration work comes with a report of the departure from Ottawa of the Canadian Arctic Expedition, organized by the Northwest and Yukon branch of the Canadian Department of the Interior.

The expedition was under the direction of Major L. T. Burwash, well known Canadian Government explorer, who has spent much time in the far North. Press reports this summer indicated that Major Burwash was off on one of his solitary jaunts, but the general Canadian Arctic Expedition, according to information from Toronto, left last city in three parties.

All three parties were equipped with thousands of radio "B" batteries on the sets supplied for the expedition by the Department of Marine and Fisheries. Word has reached headquarters of the Canadian National Carbon Company that all branches of this department are using Canadian National Carbon Company products.

Reports this summer on Major Burwash's activities indicate he was engaged in exploration of unusual scientific interest which promises to yield also an abundance of romance. He obtained a jump-start of 5,000 miles, railroad, boat and dog team lading him at the magnetic pole, the trip being planned partly as a hunt for relics of the Arctic expedition of Sir Franklin which ended in disaster in 1848.

Summer sifting back occasionally from the frozen North has told that one of Franklin's two ships, the Erebus and the Terror, may be sighted in the Arctic Ocean near the Department of Land and Boathouse Peninsula. If the ship can be found the Canadian Government will be enriched by the recovery of old relics and records believed to be aboard her.

Major Burwash also planned to investigate conditions among the Eskimo north of Mackenzie and Keewatin and the proposed tractor-trail route from Wagner Bay on the West Coast of Hudson's Bay to the Gulf of Boothia.

One of the primary purposes for the expedition assigned by press reports is to determine the westward drift of the magnetic pole so that mariners' charts may be corrected.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Grains' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

School Of Education

University Of Alberta To Assist Graduates To Enter Teaching Profession

A school of education is being established at the University of Alberta with a view to enabling students desiring to enter the profession of teaching at the end of their university career to do this far more conveniently than has been the case in the past. The university senate and the provincial department of education have arranged for the opening of the school of education during the present session, but the scheme will not be in full effect until next year.

Radio In Canada

The total number of licensed radio stations in operation in the Dominion and on ships registered therein was 216,700 on March 31, 1927.

All Night With Asthma. Everyone knows how attacks of asthma often keep their victims awake the whole night long. Morning finds him wholly unrefreshed for a day of business. Business must still be carried through. All this night suffering and lack of rest can be avoided by the prompt use of Dr. J. D. Kellogg's Lung Balm. Which positively does drive away the attack.

The California Valley quail has been successfully introduced into such distant countries as Chile and New Zealand.

Worms, by the irritation that they derive from the nourishment that they should derive from food and mal-nourishment is the result. Miller's Worm Powders destroy worms and correct the morbid conditions in the stomach and bowels that are favorable to worm life. The result is the triumph of the child is assured and development in every way encouraged.

Newspaper Paper Ground wood pulp and unbleached sulphate fibre are the chief components of newspaper paper manufactured in Canada.

Activity Of Flying Clubs

Toronto and Montreal Clubs Head All Canada In Flying Hours

The Toronto and Montreal Flying Clubs lead all Canada in flying hours, according to a report of the Department of National Defence. Up to the end of September, Toronto planes registered 881 flying hours, Montreal 590, Ottawa 480, Hamilton 408, Regina 303, Edmonton 266, London 199, Victoria 77, Border Cities 50 and Calgary 37.

Requisite On The Farm—Every farmer and stock raiser should keep a supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for all ailments, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

French Launch Powerful Sub.

A powerful submarine of a new type has been launched by the French Navy. It is the Vengeur, capable of eighteen and one-half knots an hour on the surface and ten knots under water. Sixteen men form the crew. The craft is 186 feet long, twenty-six feet wide and weighs 2,200 tons.

A Full Representation

All self-governing Dominions in the British Empire were represented this year at the Grocers' Exhibition, which was held at the Royal Agricultural Hall, Islington, London.

**EVEREADY
Laybirt**

Thousands of radio owners all over Canada have taken the guess and uncertainty out of "B" Battery power by standardizing on Eveready Laybirt "B" Batteries.

Three sizes now available—the large 45-volt size for all long speaker sets; the medium size (45 volts) for low drain sets, and the 22½-volt Laybirt for long service wherever a battery of this size is required.

Your nearest radio dealer can supply Eveready Laybirt "B" Batteries in the size you need; also, Eveready "A" and "C" batteries.

HON. J. MALCOLM TALKS TO BRITAIN OVER TELEPHONE

Ottawa, Ont.—Ten thousand people who thronged the grounds of the Cardiff Empire Exhibition, in Wales, and many thousands more throughout the British Isles, heard Hon. James Macdonald, minister of trade and commerce, speak to them from Ottawa over the trans-Atlantic telephone.

"Simply marvellous and magnificent word came back from Cardiff, as soon as the minister had finished his eight minute address. The best yet."

Mr. Macdonald's office in the parliament buildings was the Ottawa "call station."

Mr. Macdonald introduced his brief address by expressing the regards of the Canadian people to the people of Wales, and declared that the ideal of empire trade for which the exhibition stands was finding strong and patriotic support in this country.

The minister voiced a word of praise for the empire marketing "Wales Trade" he said, was only a medium through which the people of the empire became acquainted and recognized the problems and difficulties and viewpoints of the various units. To know one's self was essential, to know one's country was a patriotic duty, to know the empire was a great and profitable advantage.

Mr. Macdonald made his passing reference to the arrival in Canada of the prime minister from his lengthy sojourn abroad, and expressed Mr. Macdonald's thanks for the reception tendered him in Great Britain.

"The question of inter-imperial migration has been much discussed in recent months," said Mr. Macdonald. "While calling your attention to the speech delivered by my prime minister recently, in the course of which he declared that Canada welcomed British emigrants, may I say that British North America has in recent years been receiving as many British emigrants as are going to all other empire countries."

The return movement is naturally small, indicating that the great bulk of those who come to us are satisfied with their welcome and with the opportunities which Canada affords. Opportunities which have never been greater than today. In the year 1922 we received and welcomed 627 Welsh emigrants; this year we are receiving over 3000 every month. If an inverse problem exists on the question of migration, may I say for the government and the people of Canada that none are more ready to welcome Dominion than the sons and daughters of the British Isles."

The minister concluded with a reference to the Prince of Wales, whom Canada claimed as "a landed proprietor and taxpayer of this Dominion." His Royal Highness, as the great ambassador of the empire, representative of all our common traditions, common history and common ideals for a Triple Empire. The Prince of Wales was a joint possession.

Malcolm closed with a wish that the Cardiff Empire Exhibition might meet with unprecedented success.

Eliminating Crow Pest

Campaign in Saskatchewan This Year Was Highly Successful

Regina.—The crow and magpie population of the province has been decreased by more than 1,000,000 as a result of the activities of 4,200 cost-cutters for the 1,500 prizes offered by the Provincial Department of Railways, Labor and Industries in the 1928 crow campaign, according to the report in the Public Service monthly issued for last month.

"The success of the competition may be gauged by the results which show that 468,353 tags, and 681,716 eggs were collected. Actually, therefore, the enemy suffered a total loss of 914,069 before hostilities closed, September 1."

Cities May Have Own Aerodrome

London, Eng.—An aerodrome in every city in Britain is the program put forward by the Air Ministry. Realization of the program depends on the city councils finding the money and therefore it will not be immediate. Manchester and Nottingham have already purchased land for aerodromes and Leeds, Hull and Liverpool are expected soon to follow their example.

Viscount Alenby Honored

New York.—Field Marshal Viscount Alenby, of Great Britain, has been honored the honorary degree of Doctor of Laws from New York University.

Famine Stalks In China

Babies Being Killed On Account of Lack of Food

Shanghai, China.—The China international famine relief is being flooded with appeals from the stricken districts, particularly in Shansi, where, it is declared, "babies are being killed because there is nothing to feed them with and children are being sold for a mere song."

Thousands of persons are said to be living on the bark and leaves of trees in districts in Shansi; the famine includes districts in Kwangsi, Szechuan, Hunan and Honan.

A magistrate of Yang Hsien in a letter estimates that there are 200,000 famine sufferers, owing to the drought and the devastations of the Red Spears' a guerrilla organization.

The situation in Shansi, the magistrate declares, is unprecedented, children being sold openly in the market by parents eager for cash.

In Han thousands are on the verge of starvation, due to the banditry, common uprisings, the Red Spears and drought.

Serious Famine In Russia

Mobs In Moscow Are Openly Denouncing the Government

London, Eng.—Soviet Russia is in the throes of a famine which is reaching serious proportions, according to reports from Helsinki and Helsingfors received by the Exchange Telegraph Company here.

Mounted police are patrolling Moscow, and the Russian government, whose leaders openly denounce the government, the Helsinki report stated.

Foreign legations in Moscow are perturbed over the seriousness of the situation, although some, it is said, are opposed to intervention because it affords them a legitimate reason for leaving.

In Leningrad similar scenes were being reported in the huge report. There 750 women and children, after waiting in a bread line all night, were being applied. Angered, they used stones to bombard the window of the food stores and threatened to lynch the food distributors. A large number were arrested and later released.

Brilliant Meteoric Display Predicted

Shooting Stars Will Be Seen From November 10 To 17

Montreal.—Meteoric displays of striking brightness are predicted to occur for a period lasting from Nov. 10 to 17 inclusive, according to an aerodrome from Harvard College University, received at McGill, by Prof. A. Vibert Douglas, lecturer in physics and secretary of the Montreal centre of the Royal Astronomical Society of Canada.

These displays, commonly known as the Leonids, are predicted to occur in the northern sky south of the constellation of the Great Bear, better known as the Dipper. The shooting stars are expected to begin at midnight, and will be seen as bright flashes across the sky.

Remain In Canada

5,000 British Harvesters Still Remaining In Canada

Ottawa.—With harvesting operations completed in the west and with 5,000 British harvesters still remaining in Canada, it is probable that the majority will become permanently established, department of immigration officials stated today. Reports from steamship companies to the department indicate that approximately 2,500 have returned to the British Isles.

From the fact that very few of the harvesters have applied to government employment bureau officials of the labor department believe that in the majority of cases they have found permanent work on western farms.

Receives Prize For Research

London, Eng.—P. C. Banting, receiving the Cameron prize for research at Edinburgh University, told how he discovered insulin. He was in London, Ont., when he read an article which so affected him he could not sleep that night and at two immediate. Manchester and Nottingham have already purchased land for aerodromes and Leeds, Hull and Liverpool are expected soon to follow their example.

Spanish Royalty In London

London, Eng.—Queen Victoria of Spain, and her daughters, the Infantas Beatrice and Maria Christina, arrived here and were met at Victoria station by the King and Queen. The royal party will be the guests of Queen Victoria's mother, the Princess Beatrice, widow of Prince Henry of Battenberg.

Alberta Sheep Breeders

Officers Are Elected At Annual Meeting Held In Calgary

Calgary.—Officers elected at the annual meeting of the Alberta Sheep Breeders' Association, held in Calgary, were:

President, John Wilson; vice-president, William Hudson, of Kathryn; second vice-president, Alex. E. McDougall, Calgary; directors, W. L. Carlyle, Calgary; M. McK. Andrews, Downton; John Ramsay, Simon's Valley; Richard Knapley, Calgary; John Wilson, Jr., Innisfail; E. J. Reid, Cremona; A. M. Olson, Aldridge; R. Aldridge, Cochrane; Peter Masnie, Midslope; and H. H. McDonald, Champlain.

Meetings of the directors of the Alberta Home Breeders' Association and the Alberta Cattle Breeders' Association were also held.

GRAF ZEPPELIN LANDS SAFELY IN HOME PORT

Friedrichshafen, Germany.—Completing the first round-trip commercial trans-Atlantic flight, the Graf Zeppelin landed at the aerodrome with passengers and mail from America.

The airship, coming from Lakehurst, N.J., made the fastest crossing of the Atlantic by a lighter-than-air machine, covering a distance of 4,003 miles.

Since leaving Friedrichshafen on the morning of October 11, the Graf Zeppelin had flown approximately 10,000 miles. Going by the southern route on the westward flight, she flew 6,000 miles in 111 hours and 38 minutes.

The Graf Zeppelin arrived over her home port just 63 hours and 56 minutes from the start of her flight.

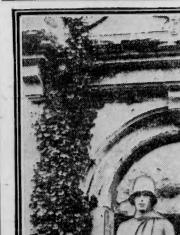

The airship thus established a new record for eastward flight by a dirigible across the Atlantic. The British dirigible R-34, in 1915, made the only previous eastward flight from Roosevelt Field to England in 75 hours.

It was revealed that the Zeppelin encountered heavy storms while flying over central France forcing Dr. Ferdinand Graf Zeppelin, commander, to alight in Paris. The speed also was reduced to less than 50 miles an hour.

With the approach of the dirigible the population of the town, swelled many times its normal size, was aroused by volleys of saluting shots. The people rushed pell-mell to the aerodrome where the crew of the Zeppelin works were already assembled at the hangar. It was raining but there was no wind.

The airship, after allowing the cheering thousands a brief glimpse of her great form, rapidly passed out of sight and then reappeared a little later over Lake Constance. Through-out the town the church bells were ringing frantically and a cannonade of saluting shots was being fired constantly. Numerous searchlights played upon the silvery sides of the dirigible as it passed over the town.

A CASTLE IN IRELAND

Princess Mary and Lord Lascelles are shown above at the doorway of their townhouse castle, in Ireland, where they were recorded a royal welcome upon the recent visit. Shortly before their arrival the stables of the castle were set afire, apparently by a fanatic, but Lord Lascelles reported that no punishment was meted out to the culprit.

Princess Mary and Lord Lascelles are shown above at the doorway of their townhouse castle, in Ireland, where they were recorded a royal welcome upon the recent visit. Shortly before their arrival the stables of the castle were set afire, apparently by a fanatic, but Lord Lascelles reported that no punishment was meted out to the culprit.

IMPORTANT ANNOUNCEMENT

Dr. Henry Marshall Tait, president of the national research council of Canada, who forecasts that at a gathering of bacteriologists in Ottawa, in the early winter an important announcement will be made concerning mankind's age-long fight against tuberculosis in animals, one of the deadliest scourges known, and a generally conceded the cause of a great deal of tuberculosis in human beings.

Newfoundland Elections

Latest Returns Show That Government Has Been Defeated

St. John's, Nfld.—The opposition party of Sir Richard Seares overthrew the government of Hon. F. C. Alderice in the general elections held when the results from twenty-nine of the thirty-seven districts had been received.

The election of the opposition candidates in St. John's City West and an opposition member in Jurin West was conceded in the latest returns, while two seats in St. John's City East, and one in Burin East, were conceded to the government.

The opposition party has now secured twenty-three of a total of forty seats and nine government supporters have been returned.

Both Sir Richard Seares and Hon. F. C. Alderice were elected. Sir Richard ran in Humber while Premier Alderice contested St. John's City East.

Contractors Supply

Stills For Workmen

Innovation Of Toronto Firm To Eliminate Costly Scaffolding

Toronto.—As an innovation in the building trade, a firm of Toronto contractors provided six-foot stilts for their workmen. The plan was to do away with the costly scaffolding.

Surprised and indignant at the plan, two workmen refused to do the stilt work and reported to officers of the United Brotherhood of Carpenters and Joiners that they lost their jobs as a result.

William Varley, secretary of the Building Trade Council, is investigating to discover whether the use of stilts would be a contravention of city or provincial statutes.

Saskatchewan Leads

In Grain Shipments

Peak Of Movement Passed In First Three Months Of Crop Year

Winnipeg.—Fully 65 per cent. of the crop has been marketed, since estimates have run around 520,000,000 bushels, and the railways have been sending 301 million bushels to date," is the report of J. G. Sutherland, superintendent of transportation for the Canadian Pacific.

"Saskatchewan is in the lead with 80,374,163 bushels shipped into elevators by rail on Canadian Pacific lines 79,073,723 bushels being shipped."

Manitoba has 55,144,225 bushels of all grains, including 10,530,915 bushels of wheat.

Alberta's marketings to date are 56,958,306 bushels of all grains, 53,192,560 of which are wheat.

With such figures as proof, Mr. Sutherland held the opinion that the movement of the movement has been passed in these first three months of the crop year.

Stricken Cows In Cattle Disease

Trout Lake, Ontario, Attacks Human Beings

Chatham, Ont.—That a Dove Township man had been infected with bacillus abortus, a disease common in cattle but previously unknown to human beings, was made known at a meeting of the Kent County Medical Association here.

The case was discovered by Dr. James Moriarty, of this city. His patient was a young man of 23, who had been in August for treatment. He had all the symptoms of typhoid fever, but various blood tests were negative.

During September and the early part of October, the man's temperature varied from 96 to 103. He grew weaker and suffered loss of appetite, headaches, pains in the joints and frequent nose bleeds. Finally a blood test revealed the disease.

WILL GIVE AID TO SETTLERS FROM THE BRITISH ISLES

Ottawa.—Important announcements made to an increase in British assisted immigration are made certain to follow the tour of Hon. Robert Forke, Minister of Immigration, through the western provinces.

Mr. Forke has just returned and in the course of this trip interviewed the Premiers of Manitoba, Saskatchewan, Alberta and British Columbia, and was warmly welcomed by them.

Surprised and indignant at the plan, two workmen refused to do the stilt work and reported to officers of the United Brotherhood of Carpenters and Joiners that they lost their jobs as a result.

William Varley, secretary of the Building Trade Council, is investigating to discover whether the use of stilts would be a contravention of city or provincial statutes.

Mr. Forke had little to say of his trip, except that all the Premiers had been much interested in immigration problems and had promised to give the most careful consideration to the many suggestions which he had made.

There is ample time for such consideration since all the settlement work is done in the spring and early summer months, and provided the Federal Department knows of much assistance it may expect from a province by the new year, the task of arranging for the movement of the settlers can be performed.

It would appear that the provinces were more interested in boy settlement than in the policies for older persons, and it is in this field that important announcements may be made.

Mr. Forke, it is understood, put forward a proposal whereby boys brought out and placed on provincial training farms should be assisted to start up as farmers, provided they could save \$500 out of their earnings. In this event the British and Canadian governments would put up \$250, and would ask the provinces to advance \$250 which, coupled with the boys' savings, would make a fund of \$500 which is considered to be ample to begin farming.

It is probable that the response of the provinces to this scheme will be enthusiastic and that a very big movement of boys will be inaugurated next year.

BRITISH LABOR MAKES GAINS IN LOCAL ELECTIONS

London, Eng.—Labor leaders are elated over gains made in the municipal elections in the United Kingdom throughout England. Incomplete returns indicate that Labor candidates made a total of 101 seats on municipal councils outside of London while their principal opponents registered a loss of 71, and independent candidates a loss of 1.

Results of the elections created exceptional interest this year, some leaders professing to believe that the vote would indicate in some degree what could be expected at the general elections throughout the country next year.

Labor gains, partial returns indicate, were made largely at the expense of Conservatives. At Twickenham the Labor party gained three seats from Conservatives. Twickenham is the parliamentary constituency of the late Lord Home of Jyngha, a Conservative.

A feature of the elections in London was the candidature of 400 women as compared with 343 who stood for office in 1925.

The 1925 elections resulted in the return of 140 women to the councils. While returns from the elections are far from complete it is known that a number of the women candidates have been elected. Seven women have been elected to the municipal council of the borough of Poplar. The 21-year-old daughter of the mayor of Poplar was elected.

Unemployed men ran for office in the elections in the London district of candidate fared worst at Southwark and Shoreditch. Three Communist candidates at Deptford were defeated. The mayor of Bermondsey was defeated in his own division.

Armistice Day Letters

Two Million Letters Sent To America From France

La Havre, France.—Two million letters, the largest mailing ever sent from France, have started to America on the French steamer Rochambeau. The letters, although advertising material, have been turned to propaganda uses. They have been addressed by hand by French war widows and are recalled. The idea is that American women getting a letter from France on Armistice Day will think of the cost of the war.

Held Lucky Ticket

Quebec Bank Clerk Wins \$35,000 On Handicap

Quebec.—Fred G. Moore, 18, a clerk in the employ of the Imperial Bank here, won the first prize in the Army and Navy Veterans pool on the Cambridge Handicap. His prize will amount to about \$35,000. He drew Palais Royal II, winner of Royal II.

Fred Gagnon, Pontypool, Ont., who drew Baytown in the pool, will receive about \$11,800 as second prize. E. A. McLaughlin, New Glasgow, N.S., holds the ticket on Insight II, placing third. McLaughlin will get \$5,600, the amount of the third prize.

Receives Death Sentence

William Hugh Megill To Be Hanged For the Murder Of Anna Goff

Shumavon, Sask.—William Hugh Megill will be hanged on February 1 for the murder of Anna Goff, King's Bench court jury found Megill guilty of slaying the 10-year-old orphan girl. The crime took place in the town of Shumavon, where Megill worked as a farm hand. No hope of mercy for the condemned man was held out by Mr. Justice H. V. Dwyer.

Militia Officers Committed

Hamilton, Ont.—Three officers of the Third Canadian Machine Gun Battalion, one of whom is alleged to have drawn his sword on a police officer, were committed for trial by Magistrate Jelfs, on charges of assaulting two police officers who arrested them at the Thistle Club.

Heavy Mail By Zeppelin

Washington.—The Graf Zeppelin carried 100,000 pieces of mail back to Germany, for which the German postal administration will be credited with \$75,712 by the United States postal service. The mail, weighing about one ton, consisted of 49,715 letters and 51,988 postcards.

N. W. U. 1758

Famous Holstein Herd Provides High Bred Cattle For Western Development

With the dual object of producing supplies for its own use and to provide high bred cattle for Western development, the Canadian Pacific Railway established about eighteen years ago a herd of Holstein cattle at Strathmore, in Alberta. This foundation herd was small, but even at its beginning included several cows afterwards distinguished as great producers. Since then only the best sires from ancestors of proven merit have been used. In the natural course of events, these sires were bound to bring about a wonderful improvement in the parent herd.

Taking as its motto "High production with show ring quality" and in stating that the Strathmore Farm and Cattle Company is a paying proposition, the Animal Husbandry Department of the Canadian Pacific has consistently pursued the policy of breeding a herd of uniformly good quality and distinctive Holstein type. Special attention has also been devoted to obtaining high milk and butter fat production.

Strathmore herd now comprises

Polar Weather Reservoirs

Within Expedition to Antarctica to Study Conditions

One of the largest of the world's two great polar weather reservoirs is the main objective of the three aviators comprising the Wilkins Expedition, now en route to Antarctica.

The ice cap, as large as Europe, which covers the Antarctic continent, is regarded by meteorologists as the focus of weather control of the southern hemisphere. The few records in existence indicate it is invariably an area of anticyclones. This is the well known kind of area marked on every United States weather map as "high," a region of high barometer pressure. A characteristic of anti-cyclones is that the air-currents, revolving about the centre of the area, tend to blow outward from the centre. A notable phenomenon of Antarctica's meteorology has been the invariable reports that the prevailing surface winds along its outer edges blow outward.

Numbers of weather experts have concluded that the South Pole may be blanketed with a "high" area as large as Australia.

Undoubtedly personal liberty is a good thing, but we don't like to live with a driver who is full of it.

CANADIAN LITERATURE

Professor Joseph McCabe, the famous English lecturer and litterateur styled "the most learned man living today" who says: "Canadian literature? I never heard of it. But Canadian science is the greatest in the world." He is at present lecturing in Canada.

Detective Stories

Good Nerve Tonic

Research Worker Claims They are

Many big business men, lawyers and statesmen have admitted a fondness for detective stories because of the excitement which they afford. Now it appears that there is still another good reason for indulging a taste for thrilling mystery tales. According to a prescription being worked out in the psychological laboratories of the University of Chicago, blood-cholesterol is an ideal sedative for the high pressure worker.

A research worker is demonstrating this theory by thoroughly scientific means, using graphs of pulse, counts of respiration and other exact data. After an hour's reading of a thriller, the subject invariably shows "a quieter pulse, a slower respiration and greater self-control." The excitement helps to prove that the reading of absorbing fiction is one of the best of nerve tonics.

Devoted readers of detective stories are ready to agree with almost anything in praise of their favorite brand of fiction. But they will find it hard to believe that when the thick pockets the pearls and dashes the lamp to the floor their pulses beat faster, or that when the Unknown Terror hurls in the dark just outside the heroine's door they breathe easily and calmly.

When Is a Canadian?

"Never" Seems To Be Answer To This Question

Many people in this country today are third and fourth generation Canadians. The vagaries of the census may write them down as English, Danish or Irish, but these people in the majority of cases have never known their own country. They know rather less about them than they probably should, and have no sense whatever of any deep and abiding personal connection with them. But apparently they are to be recorded to the end of the chapter, their children after them, under the caption of some remote nationality which is almost as irrelevant to them as Adam. This raises the interesting question: "When is a Canadian, if ever?"

Defective Eyesight

Urban Life Shown To Be Responsible For Eye Strain

As a result of the great strain on the eyes by the complexity of modern civilization, particularly in connection with urban life, it is estimated that seven out of every 10 people in the large centres of population have defective eyesight. Jerry Britton, a consulting optometrist in Montreal, in a recent address in which he presented a moving picture illustrating this, said it was caused by the reaction of the daily demands of urban life upon the delicate organism of the eye. The effect was felt by young and old alike, he said. Human eyes are not adapted to the environment given by modern civilization, according to the speaker.

Chromite Mines

Canada's principal chromite mines are situated in the Colorado district, Quebec, and are regarded as capable of producing large quantities of ore.

Viator?

"Did you see everything in Washington?"

Bob: "No, ma'am, daddy could not show me the red tape."

The longest fence in the world is one of wire-netting in Australia, 1-236 miles long. Its object is to keep rabbits from cultivated fields.

High Quality of 1928 Wheat Crop Revealed By Dominion Grain Research Laboratory Tests

Welcome To British Farmers

The Hundred Cottage Plan Is Meeting With A Good Reception

The farmers of Western Canada have accorded an unmistakable welcome to the 100 cottages plan of the Canadian Pacific Railway—the scheme jointly arranged by Lord Lovat, British Under-Secretary of Dominion Affairs and the railway's Department of Colonization and Development. As illustrating the cordiality of welcome to the British farmer families who will occupy these cottages, until graduating as full-fledged farmers "on their own"—C. Van Scoy, C.P.R. Superintendent of Colonization here, says that applications from the Canadian farmers for these cottages greatly exceed the proposed supply. The present plan is to have 20 of these cottages in Manitoba, 45 in Saskatchewan, and 35 in Alberta.

Garnet and Reward Wheat

25,000 Bushels Of Seed Wheat To Be Distributed This Year

Nearly 25,000 bushels of seed wheat of the Garnet and Reward varieties will be furnished farmers by the Department of Agriculture this year, it is announced. This compares with 2,000 bushels last year and the demand this year is greater than the supply. The new varieties were developed by the Dominion Cereals, L. H. Newman, of the Experimental Farm, at Ottawa. Garnet and Reward wheat ripens a week or more earlier than Marquis, by which time the harvest from frost and rust are considerably lessened.

To persons who have preached the

need of precautions against a lower-

ing of the standard of quality of

Canada's wheat, a report just issued

from the Dominion Grain Research

Laboratory is the most cheering of

news. It shows that the wheat crop

of 1927, though very satisfactory

from the standpoint of quantity,

was not so satisfactory from the

standpoint of the quality. He asserted

that the wheat grain in the Provinces

and inspected at Winnipeg, only

about 1 per cent. graded No. 1 North-

west, and only 6.7 per cent. graded

No. 2 Northern. In other words he

indicated that some 92 per cent. of

the wheat inspected at Winnipeg

graded No. 2 Northern or lower.

This situation Dr. Magill attributed, in

part, to weather conditions in sec-

tion of the prairie region and, in

part, to the class of grain planted by

some farmers in that part of the

Dominion. The Secretary of the

Winnipeg Grain Exchange, in re-

sponding to a topic that Mr. L. H. New-

man, the Dominion Cereals; Mr. G. A.

Clark, the Dominion Seed and Research

Commissioner; prominent members of the

Canadian Seed Growers' Association, and

the directors of the Saskatchewan

Wheat Pool, and also Mr. New-

man told the Committee on Agricul-

ture of the Dominion House of Com-

mons a year or more ago and the

Saskatchewan Seed directors, who

asserted that some farmers in Western

Canada, in the hope of attaining

higher acre yields or reducing their

risk of losses from rust infection had

been sowing varieties of wheat that

were not so desirable as the

standard varieties on the market.

The point of milling and baking quali-

ties. The report now issued from the

Dominion Grain Research Laboratory

reveals the results of tests of the

sowing and baking qualities of wheat

of the crop grown this year. The

results of the tests of the sowing and

baking qualities of wheat of the crop

grown this year. The results of the

CHAPTER V.—Continued.

"Can I cook?" repeated Andy. "E asks me can I cook! That's his first name: that's his profession. I've cooked on sailing ships, steamboats, in camps, in the Army, and I did thirty days in Sydney jail, and blame me if they didn't make me 'ed cook. I was so good they wanted me to stay."

"You're hired, Andy," said Douglas decidedly. "But isn't it going to be pretty tough to put the boxing game for cooking?"

"Seen as you've asked me I'll say that it's a binkin' sight better than 'quitter' for the tiddly-winkin'."

Douglas came to his feet. "I want you to meet Dad, Donald, and I will find out when we are to start."

Andy patted his stomach contemplatively. "Well, with this 'ere champagne under me belt, I think I'll stay in 'ere and have a drink and a fight in every bar from 'ere to Core Street. About meetin' you're done."

"He added scratching his head reflectively, 'the way I feel right now I think by tomorrow morning you'll find me in the 'bridal-chamber of the Vancouver Hotel'."

Saying which, with straightened shoulders, his head set at a characteristic angle, he swaggered down the street and with a wave of his hand disappeared within the swinging doors of the first saloon.

In his present mood Andy envied no millionaire.

"You'll like Dad," said Douglas, as they ran up the steps of the big office building. "He's rather severe looking and pretty straight-laced, but the face he wears in the office isn't the face he wears at home." He finished with a laugh.

Robert Rennie was the sole owner of the Rennie Construction and Logging Company, one of the largest organizations of the kind on the coast. He now rose from his chair and came around the desk, all the while studying Donald's face, which bore unmistakable traces of the afternoon's fight.

"Dad, this is Donald McLean, whom I told you about last night. I don't want to take up much of your time; just wanted you to meet Donald and find out when we can start on the trip to the mountains."

"Now that Gillis is here to go with you, you can go any time; the sooner the better, as we expect to have the railroad to the summit in a few weeks," responded his father, his eyes still on Donald.

"Thanks, Dad," said Douglas. "We can be ready tomorrow and leave the next day."

"Douglas, will you please go to Bowser's office and get some papers he promised to have ready today?" asked Robert Rennie.

Donald moved toward the door with Douglas.

"Sit down, Mr. McLean, and wait until Douglas comes back," invited Robert Rennie politely, as he pushed a chair toward Donald. He then closed the door of the office.

Where a girl sat pounding a typewriter.

When the older man turned his face was set in a broad smile, and he crossed the room to seize the hand of his astonished visitor in a hearty grip.

"That was a great fight today! When you got Garrius with your left in the second round and that I—going rang, I—I—heaven, but I was excited!" He was gazing at Donald with admiration glowing in his eyes.

"Mr. Rennie, I'm not a professional fighter, I—I—"

"That! That interrupted the enthusiastic 'I' can see that. By gad! that last round was a whirwind. That right you landed on his jaw—I got so excited that I fell down between the seats and skinned my shins." He rubbed his leg 'rearily.

"I never saw such speed as you showed in that last—"

Here footsteps were heard outside. Robert Rennie moved quickly to his chair, adjusted his glasses and assumed a serious expression. "Not a word to Doug," he whispered.

"Bower says that he told you he had the papers tomorrow," informed Douglas.

"Very well," answered his father. Donald turned as he was leaving the room and saw Robert Rennie close one eye in a wise wink.

"Very well," answered his father. Donald turned as he was leaving the room and saw Robert Rennie close one eye in a wise wink.

first real job, and I am going to make good," declared Douglas stoutly.

"I hope so, Douglas. As you know, I want you to work your way up on your own merits. I'm not going to show any favoritism. We are going to put a larger mill at Chaska, and one at Summit Lake, so there will be good opportunities for advancement for you and McLean if you show the right spirit."

"Is Mr. McLean going with you?" interposed Janet in a casual tone.

"Yes."

"How can he leave his business for so long?"

"He's not actively engaged in business just at present," explained Douglas glibly.

"You might ask him out to dinner tonight. I'm having a few friends in for the evening."

"You bet I will."

Donald accepted Janet's invitation with alacrity. Living within four blocks of a room and eating in restaurants had long since palled on his taste.

"Formal, very formal. You don't know Janet or you wouldn't ask her to dinner."

"I have the necessities," smiled Douglas.

Donald spent more than the usual time in dressing. He stood before the small mirror and surveyed himself with a critical eye. "Pretty soft for the ceremony. How are you off for 'soup and fish'?"

"I have the necessities," smiled Douglas.

room from the table. "Let us have our coffee served there. The light will be gone if we wait longer."

As they ascended the stairs Donald gave his host a grateful look, which Mr. Rennie returned understandingly.

That moment came when an instant familiarity in Donald's heart for this broad-minded Western millionaire.

From the eminence of the tiny roof garden the city, sliced with streets, lay at their feet. To the north the mountains were jeweled with alpine blue haze, through which towered the snow-clad peaks. To the west by the curving white sands of English Bay, and beyond, in the clear air of the long British Columbia twilight, they could see the strong mountainous peaks of Vancouver Island.

"The topography of our City," explained Robert Rennie, "lying between Burrard Inlet and False Creek, is very much like that of New York on Manhattan Island. The Narrows are deep enough for the largest ship."

"The name 'Narrows' suggests a feeble word for such a magnificent spot," observed Donald.

"Quite true," admitted Robert Rennie, "but more appropriate is the name of our public-spirited citizens suggested the name 'Lions Gate.'"

"Oh, Dad, that would be lovely!" exclaimed Janet, her eyes shining.

"The 'Lions Gate,' with the two watchful Lions looking down on all who enter. The name is most fitting."

"Yes," concurred Douglas, "Canada being one of the Lion's whelps."

THE GREAT HERBAL SKIN BALM

British Industries Fair

Increasing Interest Is Evidenced In Exhibit To Be Held in London and Birmingham

The British Government announces that the fifteenth British Industries Fair will be held simultaneously in London and Birmingham from the 18th of February to the 1st of March, 1920, inclusive.

The ever increasing growth of the Fair has necessitated the acquisition of further buildings at the White City to accommodate the immense and varied display of exhibits.

Birmingham new buildings of lasting strength have been constructed to meet the instant demands for space. In this section alone over 400,000 square feet of space is available for the display of manufactured products.

In the fifteen years of its existence the Fair has developed to such an extent that it is now classed as one of the great trade fairs of the world.

At the White City the main lines shown include toys and games, leather and leather goods, pottery and glass, wireless apparatus and accessories, clothing and textiles, food, stunts, scientific, photographic and "modern" stationary, jewelry, electrical and mechanical, sundries, fancy goods and sports goods.

The Birmingham exhibit comprises hundreds of all kinds, home-made appliances, electrical goods and machinery, including such varieties as sewing machines, elevators and welding machines, heavy battery driven casters, forges and blowers and many other types of industrial machinery.

In order to facilitate the rapid transaction of practical business the modern system of organization has been adopted. In London the general public will be excluded from admission to the Fair during business hours.

A special club for the sole use of buyers will offer many comforts and amenities and the free service of a corps of interpreters will render business relations easier between exhibitor and buyer.

Full particulars relating to the Fair can be obtained from the British Trade Commission, 703 Royal Bank Building, Winnipeg, who will be glad to issue invitations on behalf of the British Government to business men who contemplate making the trip.

Little Helps For This Week

"I have learned in whatsoever state I am, therewith to be content." —Philippians iv. 11.

But those that are contented. However things do fall, Much anxiety is prevented. And they soon freed from all. They find their labors

With much felicity; They joy in humble savors Of perfect plenty.

—Anne Collins.

The fountain of contentment springs up in the mind; and she who has so little knowledge of human nature as to seek happiness by changing anything but her own disposition, will waste her life in fruitless efforts, and multiply the griefs which she thus procures to remove.

—Ben. Jonson.

Table Removed From Abbey

After remaining in the vestrian Chamber of Westminster Abbey for 30 years, the trestle-table, which had been placed there for the use of the reviewers of the Bible, has been removed by the authorities. The work of the reviewers was completed in 1881, but the table with its red baize remained until now recently given.

The British custom of serving 44¢-dishes in business offices is fast "taking on" in Canada, as well as British executives now order Red Rose Tea for their office staffs, because it is the same quality as the finest English tea. Sold by all grocers, in bright, clean aluminum.

LEGAL NOTICE

The following is a notice which appeared in the Alberta Gazette of September 20, 1928.

Municipal District of Cereal No. 242.
Notice is hereby given that, under the provisions of the Tax Recovery Act 1922, and the amendments thereto, the Municipal District of Cereal No. 242 will offer for sale, by public auction, at the municipal office, at Oyen, Alberta on Saturday, November 10th, 1928 at 2 o'clock p.m., the following lands:

Part of Section	Trp.	Rge.	M.
SE	3	27	4
SW	30	28	5
NE	30	28	4
Part of NE	12	28	5
Part of SE	13	28	5
SW	24	28	4
SW	24	28	4
SE	7	29	6
NE	7	29	6

Oyen Plan 5782 C.D.
Lot 1 Block 2
Lot 2 Block 2
The above lands will be offered for sale subject to a reserve bid in each case and the reservations contained in the existing certificate of title. Redemption may be effected by the payment of the arrears of taxes and costs at any time prior to the sale. Terms cash.

Dated at Oyen, Alberta, this 23rd day of September, 1928.
J. P. Borashek,
Secretary-Treasurer.

Lands For Sale

The Municipal District of Bowman No. 271, holds title to the following parcels of land, which are offered for sale, subject to whatever Seed Grain Laws are registered against the properties. For particulars of price etc., apply to W. Linklater, Secretary-Treasurer, Sibbald, Alberta.

Section	Trp.	Rge.	Mer.
N.W.	10	27	1
N.E.	24	27	4
N.W.	31	27	1
N.E.	32	27	1

NOTICE TO THRESHERMEN

Owners or operators of threshing machines and combined harvesters are required to send to the Department of Agriculture at the end of the threshing season a return showing the number of acres and number of bushels threshed. This applies whether the machine has been used for custom work or only for the owner's crop.

Special forms for these returns may be secured from the Public Registry Branch, Department of Agriculture, Edmonton.

Weddings

Goodspeed—Braman

The wedding of Miss Della Agnes Braman, daughter of Mr. and Mrs. Harry Braman, of Oyen, and Mr. Clarence Egbert Goodspeed of Sibbald, Alberta, was quietly solemnized at the United Church manse, Oyen, on Wednesday, October 31, 1928. Rev. H. C. Woods officiated in the presence of immediate relatives.

Logan—Wright

The wedding of Miss Edna Mary Wright, only daughter of Mr. and Mrs. Walter Wright of Laidlaw, and Mr. Francis Joseph Logan of Cuylen, son of Mr. Logan and Mrs. George Logan of Halifax, N.S., was quietly solemnized at the home of Mr. and Mrs. Alex. Gray of Alask, on Saturday evening, November 3, 1928.

Rev. J. Douglas of the United Church, Alask, performed the ceremony. Mrs. T. M. Nunn of Oyen, the bride's aunt, was the only relative present.

About Town and Country

Don't forget the Thanksgiving supper at Excel on Monday, November 12. Supper served from 6 o'clock till 8 p.m.

Mr. Jack Aylesworth returned home from Edmonton last Saturday, in response to a wire advising him of the serious illness of his father.

Mr. and Mrs. George T. Nelson left Monday morning for Montreal en route to the old country, where they will spend the winter months. Mr. Nelson who is one of the pioneers of this district, will pay his first visit home, near Selby, Yorkshire, since coming to Canada.

Olaf Bakke and Ted Momb, left to-day for Edmonton. They intend to go north on a moose hunting trip.

Allan Sharp who has recently been in Montana, arrived in Oyen last Sunday on a short visit to his home here.

Father Lynett, who has been visiting in eastern Canada, and the United States, returned to Oyen last Saturday.

Rumsey, Oct 31.—While driving a car here to-day, Sam Kurechanko crashed into a freight train, but miraculously escaped without injury. Edward Banks, a fellow passenger in the car, jumped before the impact, and was uninjured. Sam stayed with the car, and although the auto was badly wrecked, he escaped with a slight scratch on leg.

Mr. George Doreux of Benton, left last Saturday en route to the old country where he will spend the winter months.

Mr. F. E. Torpey of Youngstown, will conduct an Armistice service in All Saints Church, Oyen, on Sunday, November 11, at 10.50 o'clock in the morning.

The prize list for the Alberta Provincial Poultry Show, which is to be held at Calgary, December 4th to 7th, 1928, is now ready for distribution, and copies may be had by request from the Secretary, Calgary Poultry and Pet Stock Association, Exhibition offices, Calgary.

Prospective exhibitors would do well to procure a copy of the prize list early and study its contents.

Mr. F. L. Aylesworth, is lying seriously ill at his home, suffering from pneumonia. At the time of going to press his condition was considered slightly improved.

School Teachers Convention
Cancelled

The convention of school teachers of the Oyen Inspectorate which was scheduled to be held in Oyen, Thursday and Friday, November 8-9, has been cancelled. This action was taken by the executive last Saturday, on account of the serious illness of Inspector Aylesworth.

Hoover Will Be Next President

Hoover was elected president of the United States yesterday. Incomplete returns received over the radio give him an overwhelming majority.
